

Protect yourself with Passwords

For details see [overleaf](#)

Have you set up your password?

Most utility companies operate a password scheme allowing you to register a password of your choice with the company. Once you have registered a password any caller from the company can be asked to provide the password before being given access to your property.

If they cannot provide the password they are not from the utility company and you should not let them in!

Write down your numbers here:

Croydon Council Trading Standards	020 8407 1311
Police	101 (In an emergency always dial 999)
Thames Water	0800 009 3964
British Gas	0800 072 8625
